Leading with Agility

Description

Leading with Agility is a standalone course that equips leaders with the skills needed to drive efficiency across teams and organizations by emphasizing excellence in goal management, decentralized decision-making, and effective communication

Overview

Learning Objectives
- Identify common blockers to efficient operations
- Link the need for clearly defined and communicated strategy to the ability to work with agility
- Define decentralized decision-making and scaffold a framework for decision-making authority
- Develop comfort with decision-making and project managing frameworks like the DACI model
- Highlight opportunities within current operations that could benefit from more efficiency

Format/Activities
- Slide Deck
- Case Study
- Group Discussion
- SpaceTeam breakout competition
